EDUCATION & QUALIFICATIONS

Sheffield Hallam University - BSc Hons. Web System Design

UK, Sheffield

Key Course Modules:

2013 – 2017

- WSD is a practically oriented, vocational course in the understanding, design and exploitation of computation and computer technology, particularly as applied to the creation of web-based business applications and their supporting infrastructure. Programme aims three-folds. One is to develop my technical awareness, typically intending to take web development or IT team leader/management roles. The second aim is to develop a critical awareness of the current and coming technical environments, particularly in the area of the design, implementation and support of robust business-to-client and business-to-business web-based information systems. Also an objective of the course is to equip myself with key skills required for employment within the IT industry and a strong understanding of the need for continuing professional development and lifelong learning.
- A module breakdown available upon request.

Sixth Form Priory Lincoln School of Science and Technology

- BB at A2 for IT Double Award.
- B at A2 Photography.
